### III. General information on data processing

#### 1. Scope of personal data processing

We collect and use the personal data of our users only insofar as this is necessary for the provision of an operational website, and for our content and services. The collection and use of the data of our users is generally only carried out after our users have provided consent. An exception is applicable in cases where it is not possible to obtain prior consent for genuine reasons and processing of the data is permitted in accordance with statutory regulations.

#### 2. Legal basis for processing personal data

Insofar as we obtain consent from the affected person for processing procedures relating to personal data, Art. 6 Section 1 (a) EU General Data Protection Regulation (GDPR) shall serve as the legal basis.

When processing personal data which is required for fulfilment of a contract to which the affected person is the contracting party, Art. 6 Section 1 (b) DSGVO shall serve as the legal basis. This also applies to processing procedures that are necessary for pre-contractual measures.

If processing of personal data is necessary in order to fulfil a legal obligation that our company is subject to, Art. 6 Section 1 (c) DSGVO shall serve as the legal basis. For cases where the vital interests of the affected person or another natural person render the processing of personal data necessary, Art. 6 Section 1 (d) DSGVO shall serve as the legal basis.

If processing is necessary to uphold a legitimate interest of our company or a third party and if the interests, basic rights and basic freedoms of the affected person do not outweigh the first-mentioned interests, Art. 6 Section 1 (f) DSGVO shall serve as the legal basis for processing.

### **3. Data deletion and storage period**

The personal data of the affected person are deleted or blocked as soon as the purpose of storage no longer applies. Storage beyond this date can take place if such storage is envisaged under the European or national statutory legislation in Union directives, laws or other regulations to which the Controller is subject. Blocking or deletion of the data also takes place if a storage period envisaged under the aforementioned standards expires, unless there is a need for further storage of the data for purposes of concluding a contract or for fulfilment of a contract.

## **IV. Provision of the website and creation of log files**

### **1. Description and scope of data processing**

Every time our Internet site is accessed, our system automatically records data and information about the computer system of the computer accessing our website.

The data are also stored in the logfiles of our system. These data are not stored together with other personal data of the user.

### **2. Legal basis for data processing**

The legal basis for the temporary storage of the data and the logfiles is provided by Art. 6 Section 1 (f) DSGVO.

### **3. Purpose of data processing**

The temporary storage of the IP address by the system is necessary in order to deliver the website to the computer of the user. This requires the IP address of the user to be stored for the duration of the session.

Storage in logfiles is carried out in order to ensure the operational capability of the website. We also use the data to optimize the website and to ensure the security of our information systems. Evaluation of the data for marketing purposes does not take place in this context.

These purposes also include our legitimate interest in data processing in accordance with Art. 6 Section 1 (f) DSGVO.

### **4. Duration of storage**

The data are deleted as soon as they are no longer necessary to achieve the purpose for which they were collected. If the data are collected for provision of the website, this is when the relevant session comes to an end.

If the data are stored in logfiles this is the case at the latest after seven days. Additional storage beyond this period is possible. In this case, the IP addresses of the user are deleted or rendered anonymous so that allocation to the accessing client is no longer possible.

## 5. Objection and elimination option

The recording of the data for provision of the website and storage of the data in logfiles is absolutely essential for operation of the Internet site. The user therefore has no opportunity to object.
